

100% Biodegradable Products Catalogue

www.pulpbase.com

A pair of hands, one from the left and one from the right, are shown holding a small, detailed forest scene. The hands are positioned as if they are gently cupping the scene. The forest scene includes a stream with several brown, egg-shaped objects floating in it, surrounded by lush green trees and foliage. The background of the entire image is a soft-focus forest with sunlight filtering through the leaves.

About To Pulpbase

A Brand By Wrenova Global PVT LTD.

Pulpbase is a sustainable products brand dedicated to making biodegradable alternatives more accessible to businesses and communities across global markets. We offer a diverse range of practical solutions designed to support the growing shift towards responsible everyday consumption.

Our portfolio includes biodegradable cups, glasses, plates, trays, spoons, cutlery, food service essentials, and a growing range of environmentally responsible products. With a strong commitment to quality, reliability, and responsible business practices, we serve businesses seeking practical alternatives to conventional single use products.

At Pulpbase, sustainability is more than a product category. It is the foundation of our purpose. We aim to build lasting relationships by delivering dependable products, consistent service, and thoughtful solutions that help businesses make better choices for their customers and the environment.

Pulpbase Mission

Our mission is to make reliable, high quality biodegradable products more accessible through a diverse product portfolio, responsible business practices, and dependable service. We strive to make sustainable alternatives practical, accessible, and commercially viable while contributing to a cleaner and more responsible future.

Pulpbase Vision

Our vision is to establish Pulpbase as a trusted global name in biodegradable products, making sustainable alternatives a preferred choice for businesses around the world and contributing to a future where everyday convenience and environmental responsibility go hand in hand.
